

Students Management Software at European University Republic of Macedonia

Associate Professor Toni Stojanovski, PhD

Students Management Software

- ▶ Windows desktop application running on .NET platform and MS SQL database
- ▶ Access is given only to staff from Students Administration Office (SAO)
- ▶ Students can register for exams
- ▶ Professors have no read/write access
- ▶ All data (results from exams, payments, diploma thesis etc.) is entered manually by staff from SAO

Electronic Notice Board(s)

- ▶ Several applications aiming to notify students on Web, Moodle, LCD displays in campuses
 - ▶ All are Windows Desktop/Web applications running on .NET platform and MS SQL database
 - ▶ Professors can enter class schedule, notifications, exam results
- ▶ Moodle – e-learning system
- ▶ No integration between Students Management Software, Electronic Notice Board applications, and Moodle

Strategic Aims for Students Management Software

- ▶ One integrated software that manages students' records in paperless fashion, notifies students via SMS, email, social networking sites etc.
- ▶ Support for administrative procedure in EURM as an integrated university
- ▶ Role based access
 - ▶ SAO staff
 - ▶ Professors
 - ▶ Students
- ▶ Built-in Content Management System, Blog, Forum
- ▶ Integration with Facebook, Twitter, LinkedIn
- ▶ Support for Alumni
