Conclusions of Fifth Workshop held in Skopje on 04.02.11

The main objective of this workshop was to discuss details of technical specification, and open issues for those open issues that occur among different working groups. The meeting was held in Skopje and the following participants were present: Marjan Gusev (UKIM), Ana Madevska (UKIM), Anastas Misev (UKIM), Ljupco Antovski via skype (UKIM), Ivan Chorbev (UKIM), Dejan Gjorgjevikj (UKIM), Pece Mitrevski (UKLO), Gjorgji Manceski (UKLO), Zoran Zdravev (UGD), Vlado Gicev (UGD), Toni Stojanovski (EURM), Saso Gelev (EURM), Sime Arsenovski (FON), Risto Malcevski (FON) and Slavco Chungurski (FON). The participants brought the following conclusions:

- All project leaders to deliver reports about workload performed in corresponding working groups.
- Project coordinator to schedule a meeting with the Ministry to coordinate web services to exchange data.
- All project leaders to submit final docs with technical specification by Wednesday 09.02.11
- Specification of user interfaces to be realized by 01.03.11

WG1

- The document is done and minor changes and additions are to be realized.
- It is defined as standalone app and will keep data until enrolment is finished and data transferred to Core module.
- All relevant reports for ministry are included.
- To specify web service for migration.
- To define web service specification for report delivery to Ministry.
- To deliver the final version by Wednesday and send it to partners for expertise analysis.

WG2 – Core module

- Latest version was 3.5 and a lot of coordination was realized with WG1, WG 3 and WG4 for data migration, reporting, finance management and user admin
- To specify form in core module to verify the transfer from enrolment to core module
- To realize two modes for payment: pre- and post-paid.

WG3 – AAA module and interface to internal systems

- To integrate specification for internal systems and core module
- To specify a standalone finance application which only checks if payment is realized for postpaid or prepaid approach

WG4 – Reporting module and interface to external systems

- To specify Web Service to exchange of student data to other university and Ministry of Education.
- To realize EKTS reporting and Diploma supplement.
- Universities to provide report templates toward external entities – ministries, …
